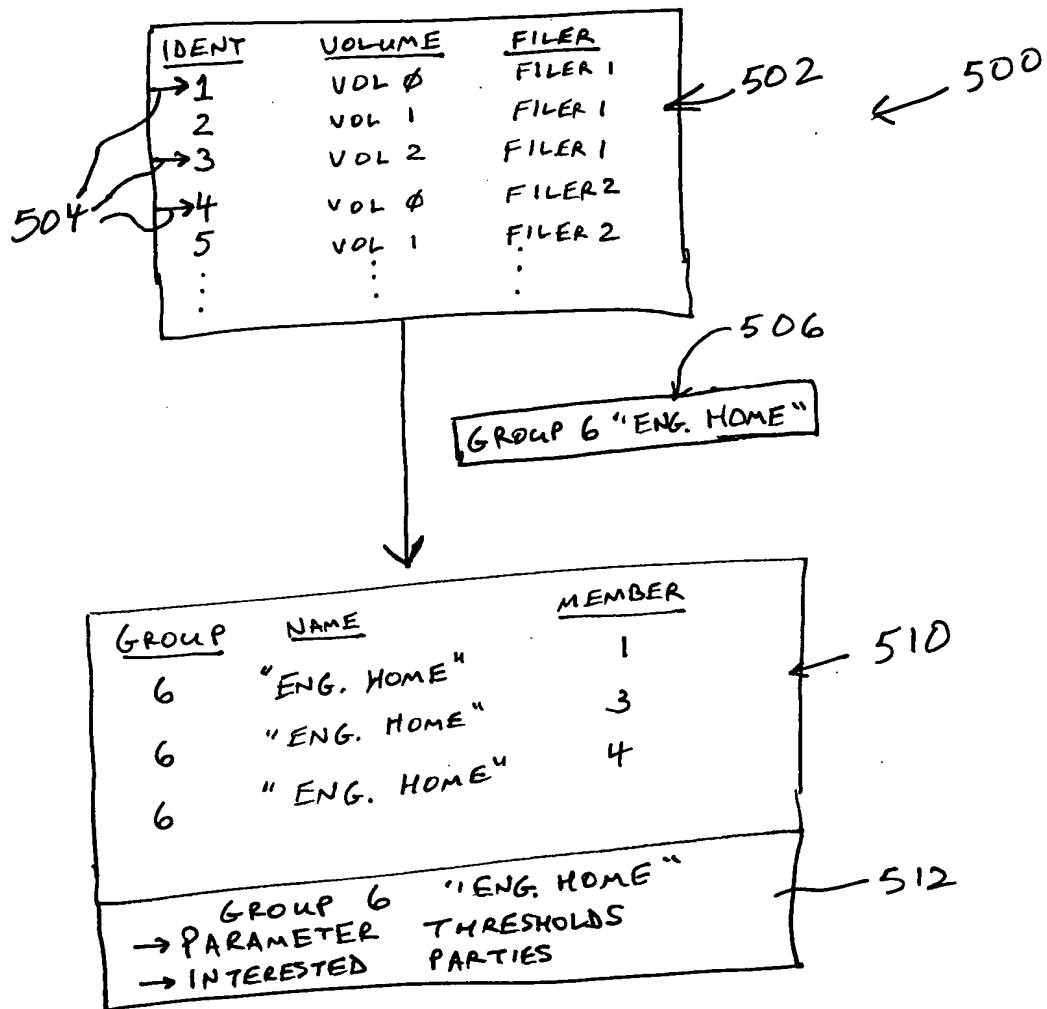

Fig.5

The diagram illustrates a network management system architecture with the following components and connections:

- Alert APIs (SMTP):** A dashed box containing the **EVENT** component.
- Database:** A cylinder representing the data storage.
- Monitor Discovery Poll (SQL):** A circle representing the monitoring process.
- CGI Commands:** A circle representing the command interface.
- Web Server:** A circle representing the web service.
- File System APIs (SNMP):** A dashed box containing the **TO NET CACHE**, **TO FILER1**, and **TO FILER2** components.
- Management Station:** A box representing the user interface, containing **WEB PAGES**, **WEB BROWSER**, and **ADMIN/CLIENT GUI**.

**Connections and Data Flow:**

- EVENT** sends an **E-MAIL** to **TO INBOX OF INTERESTED PARTY (WITH LINK TO WEB PAGE)**.
- EVENT** and **DATABASE** are connected via **SQL ODBC**.
- DATABASE** and **MONITOR DISCOVERY POLL (SQL)** are connected via **SQL ODBC**.
- MONITOR DISCOVERY POLL (SQL)** sends a **MESSAGE (HTTP)** to **EVENT**.
- MONITOR DISCOVERY POLL (SQL)** is connected to **CGI COMMANDS** via a **LINK**.
- CGI COMMANDS** and **WEB SERVER** are connected via **CGI**.
- WEB SERVER** sends **HTTP** requests to the **WEB PAGES** component of the **MANAGEMENT STATION**.
- FILE SYSTEM APIs (SNMP)** send data to **TO NET CACHE**, **TO FILER1**, and **TO FILER2**.

**Reference Numbers:**

- 600: Points to the **LINK** between Monitor and CGI.
- 602: Points to the **MONITOR DISCOVERY POLL (SQL)** component.
- 604: Points to the **FILE SYSTEM APIs (SNMP)** component.
- 608: Points to the **EVENT** component.
- 614: Points to the **CGI COMMANDS** component.
- 616: Points to the **WEB SERVER** component.
- 617: Points to the **MANAGEMENT STATION** component.
- 618: Points to the **WEB PAGES** component.
- 619: Points to the **ADMIN/CLIENT GUI** component.
